

Software Solutions

An 'Out of the box Intranet/Extranet'

VORTEX provides:

- A centre for communications with all staff, anywhere, anytime
- Ability to share information & communicate with customers & suppliers
- On line training to customers & staff
- Internal email – from anywhere – even with no email account
- Message Board, Chat rooms, Company calendar & lots more!

An extranet is a web based solution that can only be accessed by defined users & can be accessed from anywhere, anytime. It is typically used to support communications within a business & with clients.

VORTEX is special because:

- It is a ready built system – so can be customised very quickly
- It is a cheap ready made solution – so there are no development costs.
- It is hosted by Accubiz – so no equipment or network is required
- It is constantly being developed & maintained – so clients will benefit from continuous improvement

VORTEX - for your business.

The **VORTEX** solution will be customised for your business –so you can choose:

- The branding
- The structure of the zones & sub zones that contain the information
- Who will be allowed to use it

VORTEX – bespoke solutions

We can also incorporate specific solutions that will enhance your business. Examples are:

- A time / attendance system for a marketing company
- A program that calculates the cost of finance for a motor company

Such solutions & other parts of VORTEX can be made exclusive or carry on-line charging. Quotes for such solutions are available as 'add on' developments.
